

Water Trap

1. Specification:

Product name	Water Trap
Function	Water vapor filtration
Material	PC
Gas Resistance	Less than 10mmHg (standard baro pressure)
Dimension	55 x 60 x 33 mm
Weight	25g
Lifetime	Suggest 1 Month

2.Product Picture:

3. Principe:

It adopts a special water vapor filtration structure, and there is a special water vapor filter element inside, which can prevent water vapor from entering the inside of the sensor. During use, it should be used with the L-shaped connector & drying tube configured by the manufacturer. At the same time, it is necessary to ensure that there is no liquid condensed water in the sampling tube. The water trap can be used continuously for 1 month. Please replace it after reaching the end of its service life.
